## Projects

- Development of a Password Manager app, written in Java for desktop multi-platform (Windows, Linux and Mac OS). This project contributed to a significant increase and improvement of knowledges related to the Java programming language, as well as a lot of programming concepts, which were acquired due to my self-learner profile and pro-active attitude. This project was also used as a final project for the Java Programming components of the IT and Systems Technician professional course;
- Development of a website, with the purpose of being used as a personal portfolio/CV (*Curriculum Vitae*) and as a way of showing my work and skills. This website was also developed within the scope of the Web Design components of the IT and Systems Technician professional course;
- IT-related workshop to seniors, organized within the scope of the English component of the IT and Systems Technician professional course.
